Issue 1 ~ October 2018

Language Arts: Julie Wilson jmwilson1@fcps.edu

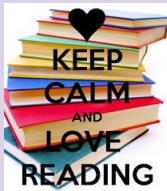

Mathematics: Kim Saunders kasaunders1@fcps.edu

Innovation: Wendy Stobbe wmstobbe@fcps.edu

LANGUAGE ARTS

Our students are off to a great start learning about themselves as readers. They are learning about how to read with a partner and talk about books. In the upcoming weeks, most grade levels are beginning to explore characters. In Kindergarten we begin by learning about characters and connecting to their feelings. By 4th grade, we are tracking how characters change over time. 5th and 6th grade have begun reading and exploring poetry. Keep a look out for some great projects!

The links that Ms. Stobbe has provided are great resources to help assist as you work with your child.

MATHEMATICS

Mathematics at Olde Creek is a hands-on learning experience that helps students transition from conceptual understanding (manipulatives, pictures, meaning) to the abstract (numbers, algorithms, procedures).

Although you may not have learned math conceptually as a child, we appreciate you supporting our math program! If you have any questions about how your children are learning a concept so you can help them at home, please ask! We love talking math!

INNOVATION

Our new Innovation Lab, renamed "Creations Cave" by the students, has opened this year! This is a space where classes can go to apply [Critical and Creative Thinking Skills](#) and [Portrait of a Graduate Attributes](#) while working through the engineering design process.

Students are encouraged to explore new materials, work collaboratively, and take risks in order to solve real-world problems.

Teachers continue to integrate Project-Based Learning into their curriculum, building upon students' guided inquiry practices.

Important Dates

AAP Info Night - Wed, Oct. 17th 6-7pm

Math Night - Thursday, November 8th

Literacy Night - Thursday, February 7th
